

Assembly Instructions - Mini Display Stand

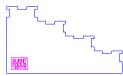

1. Build the middle structure (B through D) standing upright on edge.
2. Attach side to unit, making sure tabs align. Do NOT force or tabs may break. On larger units, this may require extra assistance.
3. Flip the unit and attach the second side as you did the first side in step 2.
4. Lay on table in proper orientation, gently push side together to ensure a snug fit
5. Gently squeeze each layer edge to ensure a snug fit
6. Apply glue as required.

- A. Tier Side, comes in standard or shallow, and left or right (Left or right not identified in parts list, left pictured below)
- B. Back, comes in standard or shallow. Used for back of unit, and first (bottom) front of unit
- C. Top, comes in polyhedral, round, or solid. Same part for standard and shallow.
- D. Front Slot, come in standard or shallow. Used for all middle shelves to support both the shelf above and the shelf below it.

Parts List
