

Assembly Instructions - Test Tube Stand

1. Build the middle structure (B through F).
2. Attach side to unit, making sure tabs align. Do NOT force or tabs may break.
3. Attach the second side as you did the first side in step 2.
4. Lay on table in proper orientation, gently push down middle pieces to ensure a snug fit
5. Gently squeeze front edges to ensure a snug fit

- A. Side comes left or right (Left or right not identified in parts list, left pictured below)
- B. Back of the unit.
- C. Front of the unit adds support for larger tiers.
- D. Top of the display includes one row of larger holes for pass-through.
- E. Middle tier includes larger holes for pass-through, and smaller holes for product support.
- F. Bottom tier includes one row of smaller holes for product support
